

To Co-op

Construction traffic route

Traffic leaving hospital to turn right onto front street and head south on Hwy 97 around the loop and turn left at street light in front of police station. Traffic then to head back north on 97 to turn left at lights at Quesnel Hixon rd. Trucks returning to site to come from the north and turn right onto Bowron ave and then onto Walkem. This is the route in which 90% of our construction will take. Other traffic coming to site from the south end will use the pullout lane on front street to turn left onto Bowron. Signage indicating trucks turning to be placed at suitable places along route.
