## 2016-2017 Influenza Program Information

**The community start date for this year's publicly funded influenza campaign is November 7, 2016**

### Vaccine Ordering and Distribution

We will be receiving our Influenza vaccines in weekly allotments beginning the last week of September in to the first week of November. We expect to have most of our supply of influenza vaccine products to redistribute to physicians and other community vaccine providers in October; however, we will have only received a partial shipment of our Fluad by the end of October.

Please note that due to the incremental arrival of vaccines, we may not be able to fill all orders completely at the onset. We will endeavor to ensure fair and equitable distribution to all community partners and fill your complete order in as few installments as possible.

As was done last season, physicians and all community vaccine providers (pharmacists, nurses in First Nation communities, acute, residential care facilities, workplace health & safety, and others) are requested to fill out the Influenza Vaccine Order Form when ordering influenza vaccine. Your order for pneumococcal vaccine can be placed at the same time.

**The Northeast will not be receiving any Fluviral. Agriflu has been ordered in replacement.**

[Click here](#) to access Influenza Order Forms

The form can be found at: <https://northernhealth.ca/Professionals/ImmunizationResourcesTools.aspx>  
Please fax your order at your earliest convenience to the local Health Unit at the number identified on the order form. After receipt of your vaccine order, influenza vaccines will be available for pick up starting the week of October 24, 2016 (date of vaccine pick up is dependent on vaccine delivery to health units). If sufficient supplies arrive earlier, you will be notified of an earlier pick up date.

### Reminders:

- Call the Biological Product Monitor (BPM) at your local Health Unit to arrange your vaccine order pick up date.
- Agriflu and Fluad packaging require more storage space as it is single dose pre-filled syringes. Please bring additional coolers to accommodate the extra storage needs when you pick up your order.
- Keep your biological fridge between 2-8 degrees.
- Notify the local BPM of any cold chain break incidents and report accordingly.
- Return all unused and partially used vials of publicly funded vaccines to your BPM. Do not dispose.
- Influenza vaccine can continue to be offered until the Health Unit sends out a request for annual influenza vaccine return.

### About influenza Vaccines:

Five publicly-funded vaccine products will be distributed in Northern Health this Influenza season. These products reflect the following World Health Organization recommended composition of influenza virus vaccines for use in the northern hemisphere during the 2016-2017 influenza season.

- A/California/7/2009 (H1N1)pdm09-like virus
- A/Hong Kong/4801/2014 (H3N2)-like virus
- B/Brisbane/60/2008-like virus
- B/Phuket/3073/2013-like virus (In quadrivalent vaccines only)

The A/Hong Kong/4801/2014 strain was not contained in the 2015/16 season vaccine; the B/Brisbane/60/2008-like strain was contained in quadrivalent but not trivalent vaccines in the 2015/16 season.

### Influenza vaccine products:

- Flulaval® Tetra
- Flumist® Quadrivalent
- Fluviral®
- Flud®
- Agriflu®

## Adverse Reactions Following Immunization (AEFI):

All significant adverse reactions following immunization with any vaccine product are to be reported to the local health unit. The Medical Health Officer's recommendations for future immunizations will be sent to the immunizer.

The form for reporting Adverse Events following Immunization is available at: <http://www.bccdc.ca/health-professionals/professional-resources/surveillance-forms>

For more information on Adverse Events Following Immunization please visit BCCDC website at:

[http://www.bccdc.ca/resource-gallery/Documents/Guidelines%20and%20Forms/Guidelines%20and%20Manuals/Epid/CD%20Manual/Chapter%202%20-%20Imms/SectionIX\\_AdverseEventsFollowingImmunization.pdf](http://www.bccdc.ca/resource-gallery/Documents/Guidelines%20and%20Forms/Guidelines%20and%20Manuals/Epid/CD%20Manual/Chapter%202%20-%20Imms/SectionIX_AdverseEventsFollowingImmunization.pdf)

## EGG Allergies/ Oculo-Respiratory Syndrome (ORS)

Since the 2013-14 influenza season, British Columbia Guidelines have allowed for the immunization of egg allergic individuals with inactivated influenza vaccine. The live intranasal influenza vaccine (Flumist Quadrivalent) is not contraindicated for egg allergic persons. It can be safely administered to egg allergic individuals, including those who have experienced anaphylaxis following egg ingestion, according to standard practices. This recommendation is supported by recent studies that assessed the safety of LAIV in egg allergic individuals.

For unresolved questions about egg allergies and severe Oculo-Respiratory Syndrome (ORS) you may contact your local health unit or MHO. For more information, please visit BCCDC Safety Issues Applicable to Influenza Vaccines for more details on egg allergies and ORS. Accessed at:

[http://www.bccdc.ca/resource-gallery/Documents/Guidelines%20and%20Forms/Guidelines%20and%20Manuals/Epid/CD%20Manual/Chapter%202%20-%20Imms/SectionVII\\_BiologicalProducts.pdf](http://www.bccdc.ca/resource-gallery/Documents/Guidelines%20and%20Forms/Guidelines%20and%20Manuals/Epid/CD%20Manual/Chapter%202%20-%20Imms/SectionVII_BiologicalProducts.pdf)

## Reporting of Vaccines Administered

Community vaccine providers are asked to report required details for all clients who receive the Pneumococcal vaccine and for children 8 years of age and younger who receive Influenza vaccine, so that public health records are complete and administration of unnecessary doses is avoided. You will be provided with this form at the time you receive your vaccine.

Click here to access Influenza and Pneumococcal Reporting Forms: <https://northernhealth.ca/Professionals/ImmunizationResourcesTools.aspx>

## Education

For care providers new to Influenza immunizations as well as those who want in-depth information on the disease and/or vaccines please see BCCDC Immunization Competency Course: Foundations of Influenza – Disease and Vaccines at: <http://www.bccdc.ca/health-professionals/education-development/immunization-courses>

For care providers who have taken the Foundations Course and/or experienced clinicians wanting an update for this Influenza season please see BCCDC Immunization Competency Course: Seasonal Influenza Update at: <http://www.bccdc.ca/health-professionals/education-development/immunization-courses>
