

Please complete in FULL and PRINT CLEARLY. See reverse side for Terms. Subsidy may be rejected or delayed if application is incomplete, illegible or unsigned by Physician or Nurse Practitioner

1. DATE of APPLICATION

New Application Date: _____ Hospital Discharge Date: _____
 Rx Change YYYYY/MM/DD YYYYY/MM/DD

2. CLIENT DATA

PATIENT LABEL		Street Address: _____	
Surname: _____		City: _____	
First Name: _____	Middle Name: _____	Mailing Address: _____	
D.O.B.: _____	<input type="checkbox"/> Male <input type="checkbox"/> Female	Postal Code: _____	
PHN: _____		_____	
Home Phone: _____		Work Phone: _____	Cell: _____
Contact/Next of Kin: _____		Relationship: _____	Phone: _____
Extended Health Benefits (specify): _____		Other Funding (specify): VAC, NIHB, WorkSafe BC, ICBC, RCMP	

3. CLINICAL INFORMATION Note: Palliative clients must present with hypoxemia

Most Responsible Diagnosis: _____

‡ Co-morbidities: CHF Pulmonary Hypertension Safety: Smoker Active Illicit Drug/Excessive ETOH
Use Without Active Rehabilitation

‡ Evidence must be provided for co-morbid disease (i.e.: Echocardiogram, Spirometry, Discharge Summary etc). If this evidence is not available at time of discharge, a time limited subsidy for home oxygen therapy may be provided to permit additional time for submission of evidence pertaining to the co-morbid disease.

4. DIAGNOSTIC DATA: Data must be obtained < 72 hours prior to discharge date. All qualification criteria noted on reverse.

Test	Date	O ₂ Flow Rate	O ₂ Saturation	pH	PaCO ₂	PaO ₂	HCO ₃
OXIMETRY STUDIES (see reverse): <input type="checkbox"/> Resting Room Air Study Attached <input type="checkbox"/> Ambulatory Study Attached <input type="checkbox"/> ‡ Nocturnal Study Attached ‡ Daytime desaturation must be present at rest or with ambulation for nocturnal oxygen therapy to be funded. Sleep disorder breathing will only be treated with supplemental oxygen therapy if the nocturnal criteria are met despite optimal treatment (i.e.: CPAP therapy).							

Additional Information:

5. REFERRAL INFORMATION

Referring Physician or N.P.: _____	Phone VitalAire for after hours, weekends, stat holidays and urgent matters
Phone: _____ Fax: _____	
Family Physician: _____	Form must be returned to:

Completed by: _____ Phone: _____	

6. PRESCRIPTION & SIGNATURE – MANDATORY

At rest: _____ Lpm Ambulatory: _____ Lpm Nocturnal: _____ Lpm

Physician/Nurse Practitioner Signature: (mandatory) _____ Date: _____

Physician/Nurse Practitioner: By signing above you are authorizing a prescription for oxygen therapy and ongoing titration of flow rate by HOP and Oxygen Supplier Respiratory Therapist to maintain spO₂ > 90% at rest, on exertion, and nocturnally; and are accepting the Program's 'Terms' on the reverse on behalf of this client. Oxygen equipment will be determined by HOP and VitalAire

7. HOP SUBSIDY REVIEW For HOP use only

<input type="checkbox"/> Approved	Equipment Approved:

Date: _____	

Home Oxygen Program (HOP) Criteria and Information

1. TERMS

- By signing this form you are (A) Completing a prescription for oxygen, (B) Ensuring all information provided is accurate, and (C) Acknowledging the terms, ongoing involvement and clinical management of HOP with this client.
- Completing this form does not ensure that a subsidy will be granted. See Section 2 and 3 below.
- Successful applicants will be granted a temporary subsidy and an oxygen system consistent with the client's clinical needs. You do not need to choose the oxygen equipment; it will be determined for you by HOP and a VitalAire Respiratory Therapist.
- VitalAire Respiratory Therapists and HOP Respiratory Therapists will provide respiratory assessments, and oxygen titration. At-home testing may include an arterial blood gas and resting, ambulatory and nocturnal oximetry tests with the client using or not using oxygen therapy. All assessments will be forwarded to the attending physician(s) and available to the client's health care team.
- Extended Health Benefits, VAC, NIHB, ICBC, RCMP, WorkSafeBC providers are the primary source of funding for home oxygen, not HOP.

2. BC HOME OXYGEN MEDICAL CRITERIA REQUIRED FOR FUNDING

Provide as much recent and appropriate information as possible to support any **co-morbid disease** (i.e.: echocardiogram, spirometry, consultation notes, discharge summary, etc). Clinical data submitted must be obtained within 72 hours of acute client discharges. All HOP subsidy applicants are expected to seek and be compliant with optimal medical treatment. The safe use of home oxygen therapy is vital. Clients who meet the following criteria will be considered for home oxygen funding:

Resting Oxygen: Clients must be rested off oxygen therapy (room air) for a minimum of 10 minutes prior to obtaining an **arterial blood gas (ABG)** sample. Qualifying clients must have ABG's with a partial pressure of arterial oxygen (PaO₂) ≤ 55 mmHg on room air **-OR-** an ABG with a PaO₂ ≤ 60 mmHg with evidence of one of the following conditions: CHF or Pulmonary hypertension **OR** oxygen saturations < 88% sustained continuously for 6 minutes, to be measured by pulse oximetry (SpO₂) while client is on room air and at rest. Saturations must be documented at minimum of 30 second intervals to qualify. Any data submitted and identified as a single value only will not be accepted.

Nocturnal Oxygen: In the absence of the aforementioned co-morbidities, daytime hypoxemia (SpO₂ < 88%), either at rest or with ambulation, plus a nocturnal oximetry study on room air is required for nocturnal oxygen therapy to be funded. For all clients, the SpO₂ must be < 88% for > than 30% of a minimum 4 hour nocturnal oximetry study. *Sleep Disorder Breathing (i.e.: sleep apnea) will only be treated with supplemental oxygen therapy if the nocturnal criteria are met despite optimal treatment, such as CPAP therapy.*

Ambulatory Oxygen: If the client is unable to walk for one minute or more, ambulatory oxygen therapy will not be useful and will not be funded. Oxygen therapy for ambulation is intended to encourage activity outside of the home and for those clients who qualify for ambulatory funding. Ambulatory testing is to be performed on a flat surface only. The use of any exercise equipment (i.e.: treadmill) is not permissible. Clients should be tested with their usual mobility devices such as canes, walkers, etc and walk as far as possible within the 6 minute test. Note: Any post ambulation saturation values are not acceptable.

Oxygen saturations must be measured and documented at a minimum of 30 second intervals during walk tests. Qualifying clients must meet one of the following criteria:

- A. An SpO₂ < 88% sustained continuously for a minimum of one minute during a 6 minute walk test while breathing room air, AND a measured improvement in a second 6 minute walk test while breathing oxygen showing the distance travelled increases by at least 25 % AND at least 30 meters (100 feet).
- OR**
- B. An SpO₂ < 80% with ambulation for a minimum of one minute during a six minute walk test.

Infants: Separate qualifying criteria may exist. Infants with chronic needs for oxygen **must** be prescribed by Neonatologists or Pediatricians.

Palliative: Palliative diagnosis does not ensure a home oxygen subsidy. Palliative clients must qualify with the above criteria. The Palliative Care Benefits Program (PCBP) does not provide oxygen.

3. NON-MEDICAL CRITERIA:

- Must be a BC citizen for more than 3 months.
- Must be eligible for and have valid BC Medical Services Plan coverage.
- Must spend ≥ 6 months of a calendar year and continue to maintain their home in BC to maintain BC MSP coverage.
- Must be a permanent resident of Northern Health, and not reside in a facility governed by the BC Hospital Act.
- Must adhere to oxygen safety practices.
- The referring Physician/Nurse Practitioner must sign the application.

HOP will not provide client funding:

- If above eligibility criteria are not met.
- For placebo effects.
- For second reported safety violations (i.e.: smoking & using O₂)
- For misuse of oxygen or equipment.
- To operate nebulizers.
- For outpatient use from a hospital.
- For travel outside of Canada
- For travel outside of BC exceeding three months.
- For noncompliance with the prescription or terms of HOP
- VAC, NIHB, WorkSafeBC, ICBC and RCMP claimants

Approved funding for oxygen will be granted for an appropriate oxygen system for a limited time. Clients are required to maintain regular HOP respiratory assessments and sustain eligibility criteria for HOP to continue their funding. Private pay or alternate insurance coverage is the usual option for clients who do not qualify for HOP funding. Indications for home oxygen funding will be reviewed and updated as necessary to reflect changing requirements and accepted medical practice. Applications should be sent to the appropriate Health Authority Home Oxygen Program where the client maintains a permanent residence. Applications will be redirected if necessary.

4. APPLICATION PROCESS

5. **Acute Referrals:** Once the application is completed in FULL, fax the application and any additional clinical data to HOP **AND** VitalAire. VitalAire must be contacted by telephone if the discharge is after 1630 hours M-F, at any time on weekends and statutory holidays or if there is immediate information to share. See front of application for fax and phone numbers.
6. **Community/Physician Office Referrals:** Once the application is completed in FULL, fax the application and any additional clinical data to the Home Oxygen Program and VitalAire Healthcare.
