### Approval For Special Lipid Tests

In order to control the utilization of specialized lipid tests (lipoprotein(a), apolipoproteins A1 and B and lipoprotein electrophoresis, MSP guidelines require prior consultation with pathologist when ordering these asterisked tests. Specimens for these tests received by St. Paul's Hospital Laboratory without evidence of prior approval by pathologist will be reported in the following manner:

Special lipid test - MSP guidelines require pathologist approval. Specimen will be held for one week pending approval.

Please have your pathologist approve test request or if you wish our pathologist to approve the test, a brief patient history and if available current or previous cholesterol, triglyceride, HDL and LDL results **must** be faxed back to laboratory within 7 days.

***If no approval or history is received within one week, the specimen will be discarded.***
